EV Policies impact on EV Adoption

- Some of the states responded well to the EV policies (especially the one focused on Subsidy for purchasing the vehicles)

- Goa shows the clearest outperformance – the EV share grew 25x when compared with the EV share during the pre-policy period
- Goa's policy primarily targeted massive two-wheeler rental fleets, taxis, and ferry systems to green energy, backed by charging stations every 25 km

Charging infrastructure (2020 -2025)

- While most of the states have a good EV market share, they lack in charging infrastructure.
- Only Karnataka seems to excel in both (EV market share – 7.1% and with 111 EVs per Charger)
